I’m LIAM NAIDOO

"I know the formulas when the teacher explains them, but as soon as I sit down to do sums on my own, my mind goes completely blank and I freeze up."

Demographic

Age:	15
location:	South Africa
Education:	Grade 10 High School
Occupation:	Pure Math Student
Family:	High School Student

Technology

Mobile & PC Games:	★★★★★
Social Media:	★★★★☆
Messaging:	★★★★☆
EdTech / Study Apps:	★★☆☆☆
Online Calculators:	★★★☆☆

Goals

- Mastering how to apply math formulas step-by-step on paper without mental freezes.
- Practicing math at an individual pace in a low-pressure, timer-free environment.
- Getting immediate, non-judgmental hints right when getting stuck on a problem.
- Unlocking RPG rewards, spells, and story progression while solving math equations.

Frustrations

- Freezing, panicking, and making silly errors whenever countdown timers appear.
- Knowing theoretical rules but feeling lost when trying to start or write down steps.
- Getting stuck on homework with no immediate help, leading to frustration and quit-rate.
- Boring textbook worksheets that feel like repetitive chores with no visual reward.

Interests

Fantasy RPGs, PC & Mobile Gaming, Anime, World-Building, Turn-Based Strategy, Character Customization, Algebra, Story-Driven Games.
